Zebra GK420d and GX420d

Fellowship Technologies has tested and verified the functionality of the Zebra GK420d and the GX420d. This document will outline the steps for unboxing, the physical installation and the driver installation for the printer.

Unpacking

The Zebra printers come with the following:

- Quick Guide
- Drivers CD
- 6 ' USB Cable
- 100-240V External Power Supply

The Printer

The GK420d is a 4.25" direct thermal printer. It has both a USB and serial port connection for connectivity.

Zebra Installation

There are two parts to the installation – the hardware and the software.

Zebra Hardware installation

The hardware installation for the GK420d is very easy. It is as follows:

- 1. Turn the power off on the printer.
- 2. Connect the power cord to the printer.
- 3. Connect the power adapter cord to the power adapter and then plug the cord into the electrical socket.
- 4. Plug the USB cable into the printer.
- 5. Plug the other end of the USB cable into a USB port on your computer.
- 6. Don't turn on the printer's power until after installing the printer driver into Windows.

You are now ready to install the Printer driver software onto your computer.

Zebra Software Installation

The printer driver can be downloaded from the Fellowship Technologies Support site. The following process will show how to install the driver.

1. Run the Zebra Printer install application.

2. As the install begins, click OK.

WinZip Self-Extractor - ZD265904Certified.exe	×
To unzip all files in ZD265904Certified.exe to the specified folder press the Unzip button.	Unzip
Linzin to folder:	Run WinZip
C:\ZD2659 Browse	Close
 Overwrite files without prompting When done unzipping open: PmInst.exe 	About
	Help

3. Accept the defaults and click Unzip.

4. Click OK.

5. Click Next.

Options
