Check-In Application Quick Installation Guide	1
Determine the Windows Version	2
Check-in Installation for 32-Bit Windows	3
Check-in Installation for 64-Bit Windows	6

Fellowship One Check-in is a 32-bit application which means it was designed to run on 32-bit versions of Windows, but it also is able to run on 64-bit versions due to the 32-bit systems built into 64-bit Windows.

There is a difference in the installation for 32Bit versions of Windows and 64Bit Windows versions.

This procedure will show both installation options, but first it is important to know which version of Windows on which Check-in will be running.

- 1. From the Control Panel double-click the System Icon.
- 2. The System App will open.
